R Markdown

This is an R Markdown document. Markdown is a simple formatting syntax for authoring HTML, PDF, and MS Word documents. For more details on using R Markdown see <http://rmarkdown.rstudio.com>.

When you click the **Knit** button a document will be generated that includes both content as well as the output of any embedded R code chunks within the document. You can embed an R code chunk like this:

```
summary(cars)
```

```
##      speed      dist
##  Min.   : 4.0    Min.   : 2.00
## 1st Qu.:12.0    1st Qu.: 26.00
## Median :15.0    Median : 36.00
## Mean   :15.4    Mean   : 42.98
## 3rd Qu.:19.0    3rd Qu.: 56.00
## Max.   :25.0    Max.   :120.00
```

Including Plots

You can also embed plots, for example:

Gráficos

Matriz penguins, se encuentra en classroom

```
#----- # Importación de matriz #-----

Gráfico de dispersión

#-----# Organizacion de graficos #-----

1.- Descargar el paquete gridExtra

```
install.packages("gridExtra")
```

```
## Installing package into '/cloud/lib/x86_64-pc-linux-gnu-library/4.2'  
## (as 'lib' is unspecified)
```

2.- Abrir la libreria

```
library(gridExtra)
```

3.- Organizacion 2 graficos en una fila y dos columnas

```
grid.arrange(BX,GB1, nrow=1, ncol=2)
```

4.- Organizacion 3 graficos en dos filas y dos columnas

```
grid.arrange(BX,GB1,HG, nrow=2, ncol=2)
```

```
## `stat_bin()` using `bins = 30`. Pick better value with `binwidth`.
```

5.- Organizacion 4 graficos en dos filas y dos columnas

```
grid.arrange(BX,GB1,HG,GD, nrow=2, ncol=2)
```

```
## `stat_bin()` using `bins = 30`. Pick better value with `binwidth`.
```
